2008-2009 Metro Life Flight Lecture Series

Dear Colleague:

On behalf of Metro Life Flight, I am pleased to extend an invitation to attend our Fall Lecture series. These lectures focus on the continuum of care from initial pre-hospital contact to Emergency Department stabilization of critically ill patients and at times throughout the hospital course of care. They are designed to be appropriate for both pre-hospital and hospital based providers including EMT's, paramedics, and nurses. Each lecture stands on its own so you can attend as few or as many as your schedule allows.

There will be refreshments provided before each lecture as well as continuing education hours for both EMS and nursing providers. Our goal is that these lectures will provide not only learning opportunities, but also a chance to meet and network with colleagues from other organizations.

We look forward to your participation!

Sincerely,

Craig G. Bates, MD, MS, FACEP
Medical Director, Metro Life Flight
MetroHealth Medical Center
