 <p>The screenshot shows a mobile browser interface for the MetroHealth Company Portal. At the top, a blue header bar contains the text "Company Portal". Below this is the MetroHealth logo. A message states: "This website only supports the web browser Microsoft Internet Explorer. Please enter your Email Address and Password to sign in!". There are two input fields: the top one is empty, and the bottom one is labeled "Password". A blue "Sign In" button is positioned below the fields. At the bottom of the page, a message reads: "If you experience any problems signing into this site please contact the service desk at 216-957-3280." The status bar at the top of the browser shows a back arrow, signal strength, 100% battery, and 1:40 PM.</p>	<p>Enter your MetroHealth Email address and Network password and click Sign in.</p>

The MetroHealth System

Click **Continue**.

The MetroHealth System Access Setup

Let's set up your device to access your email, Wi-Fi, and apps for work. You'll also be able to manage your devices.

You will need to:

Get your device managed

The MetroHealth System requires you to accept Android permissions to secure your device.

Update device settings

The MetroHealth System might need you to set a passcode or encrypt your device.

[Learn more about device setup](#)

POSTPONE

CONTINUE

The MetroHealth System

The MetroHealth System cares about your privacy.

While setting up your device, you will see some Android system screens requesting permissions to help your company secure your device.

The MetroHealth System can never see:

- Call and Web history
- Location
- Email and text messages
- Contacts
- Passwords
- Calendar
- Camera roll

The MetroHealth System may see:

- Model
- Serial number 
- Operating system
- App names
- Owner
- Device name
- Manufacturer
- Phone number for corporate devices

[More about privacy](#)

CONTINUE

Click **Continue**.

What's next?

1. **Allow permission to make and manage phone calls**

Your Android device needs this permission to report your device's serial number and a cellular antenna ID. The MetroHealth System and the Company Portal app cannot make phone calls with this information.

2. **Activate Android device administrator**

Android device administrator allows The MetroHealth System to apply required settings to your device.

3. **Confirm KNOX privacy notice**

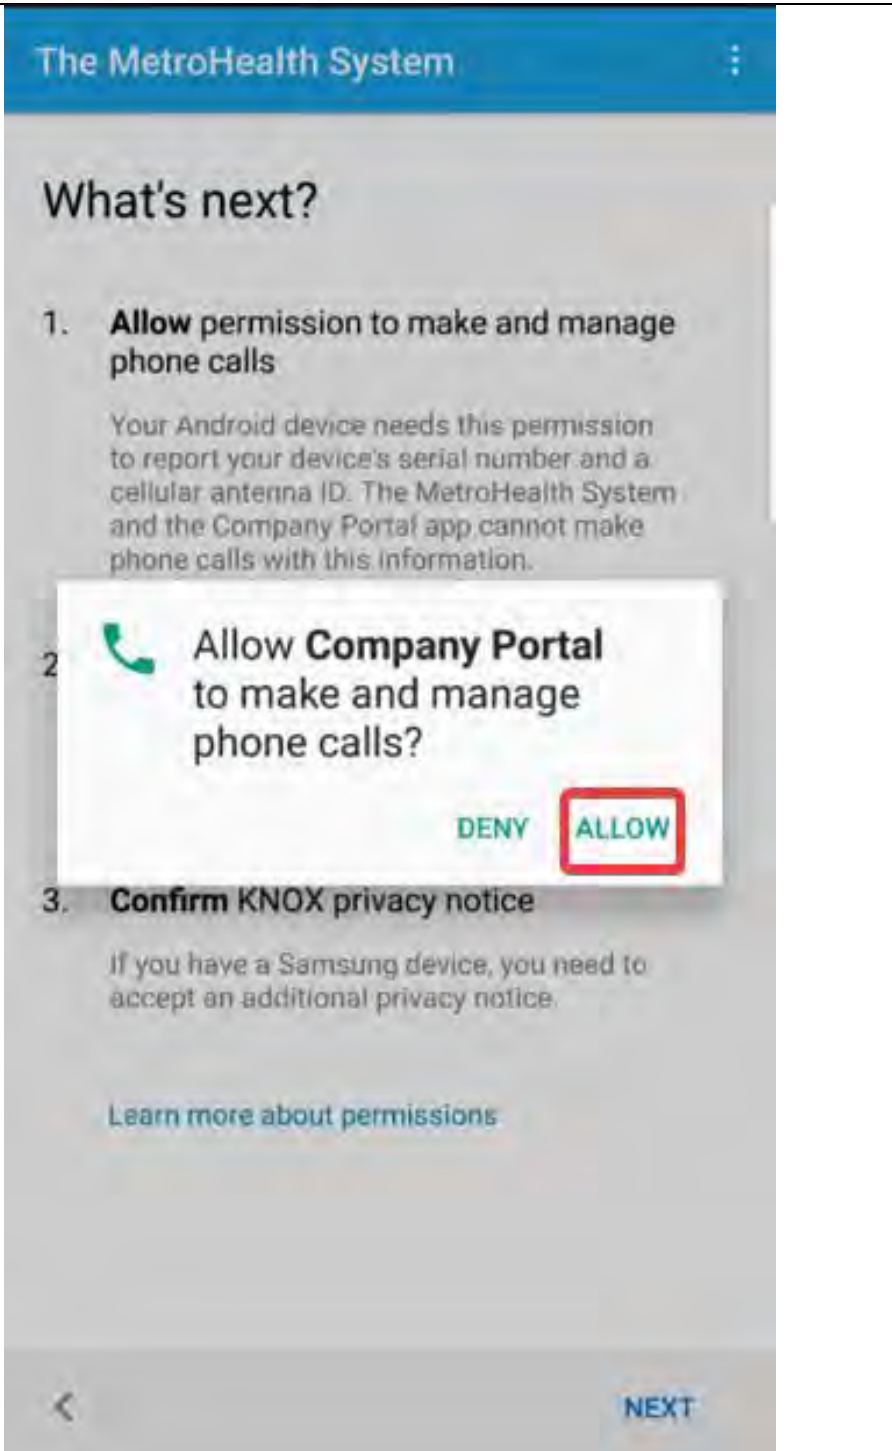

If you have a Samsung device, you need to accept an additional privacy notice.

DONE

Click **Done**.

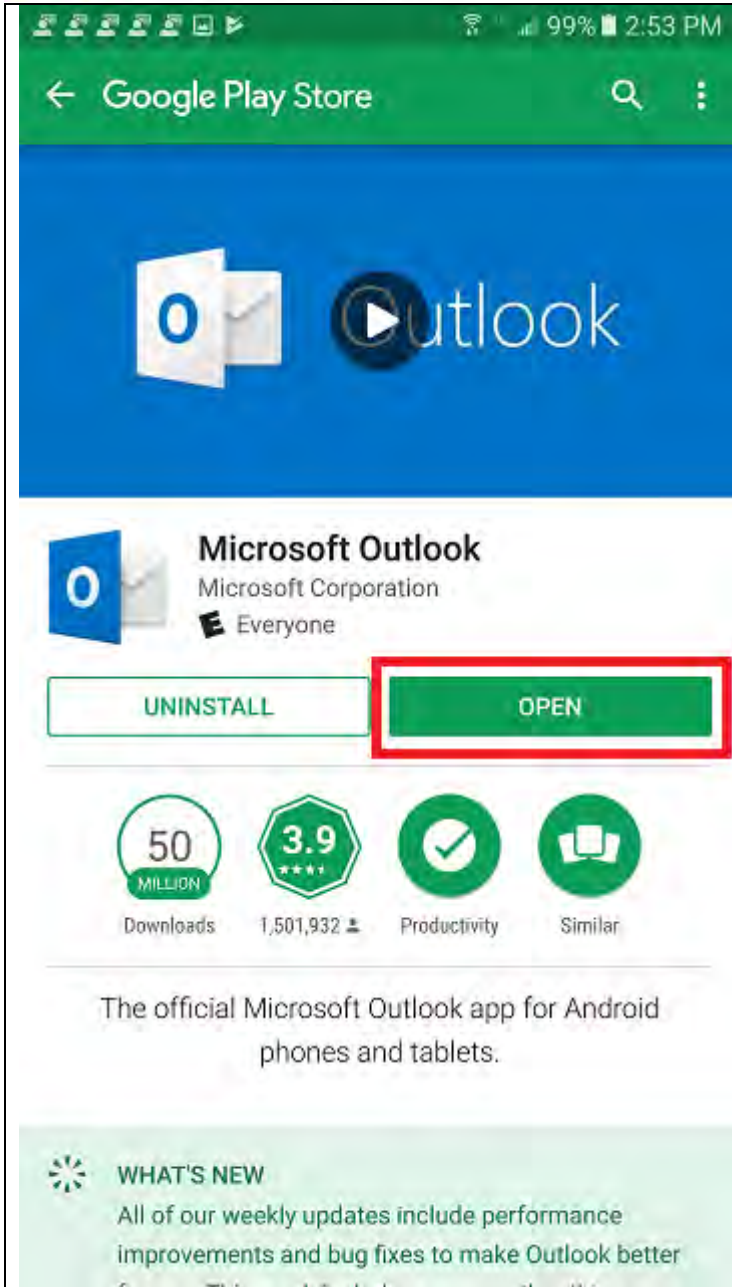

In your notifications panel click **“Required application”**
“Install Outlook from Play Store”

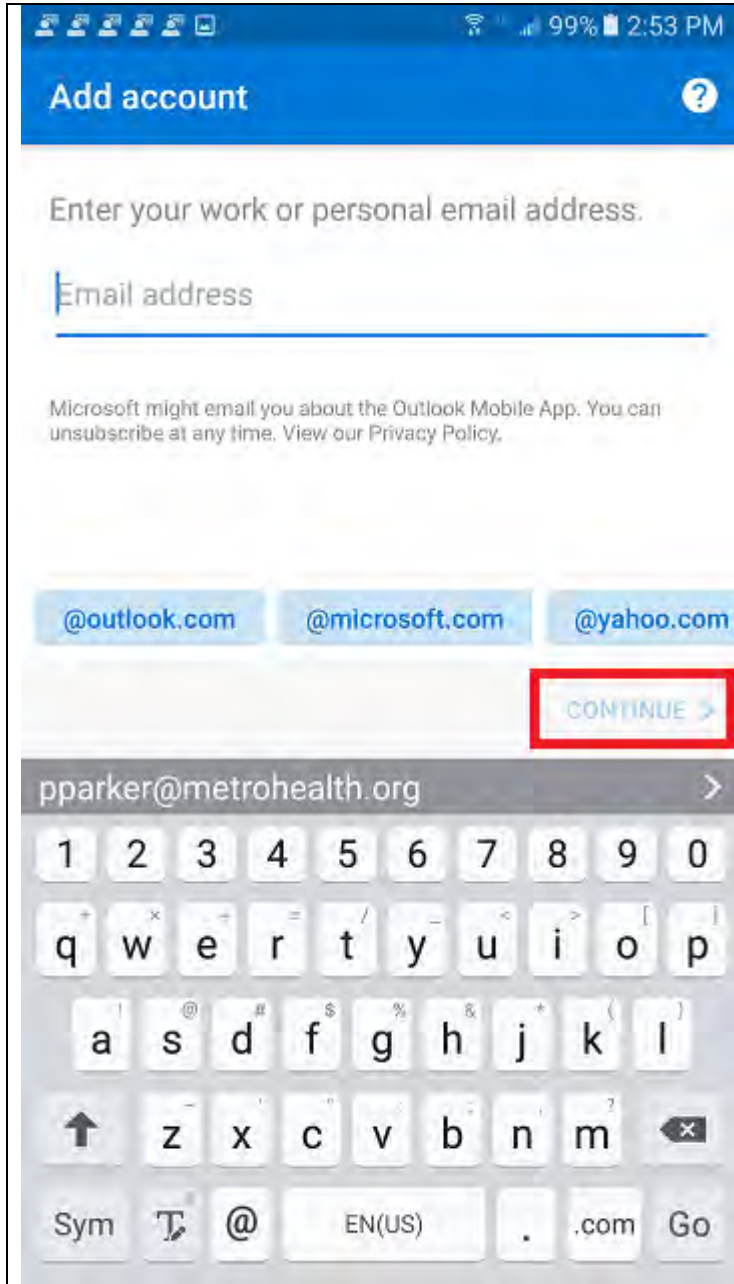

Click **Install**.

This can take up to approx. 10-15 mins. May take longer if not connected to WiFi (depends on your signal strength). Some Carriers require you to be connected to wifi if the download is too large, if this occurs, the download will not complete until you're connected to a wifi network.

Click **Open**

---	---

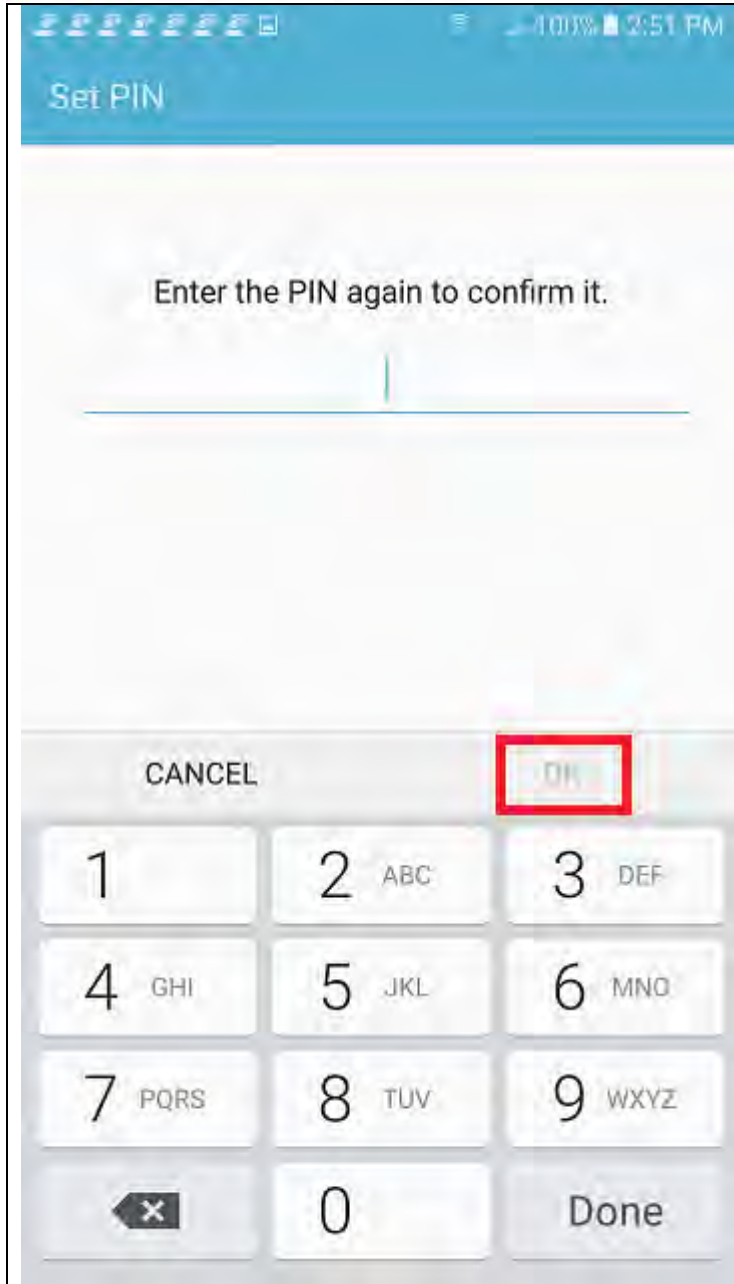

If you do not have a passcode set on your phone you will also have a notification stating, **“Secure your device” “You need to update your device passcode”** Click the notification.

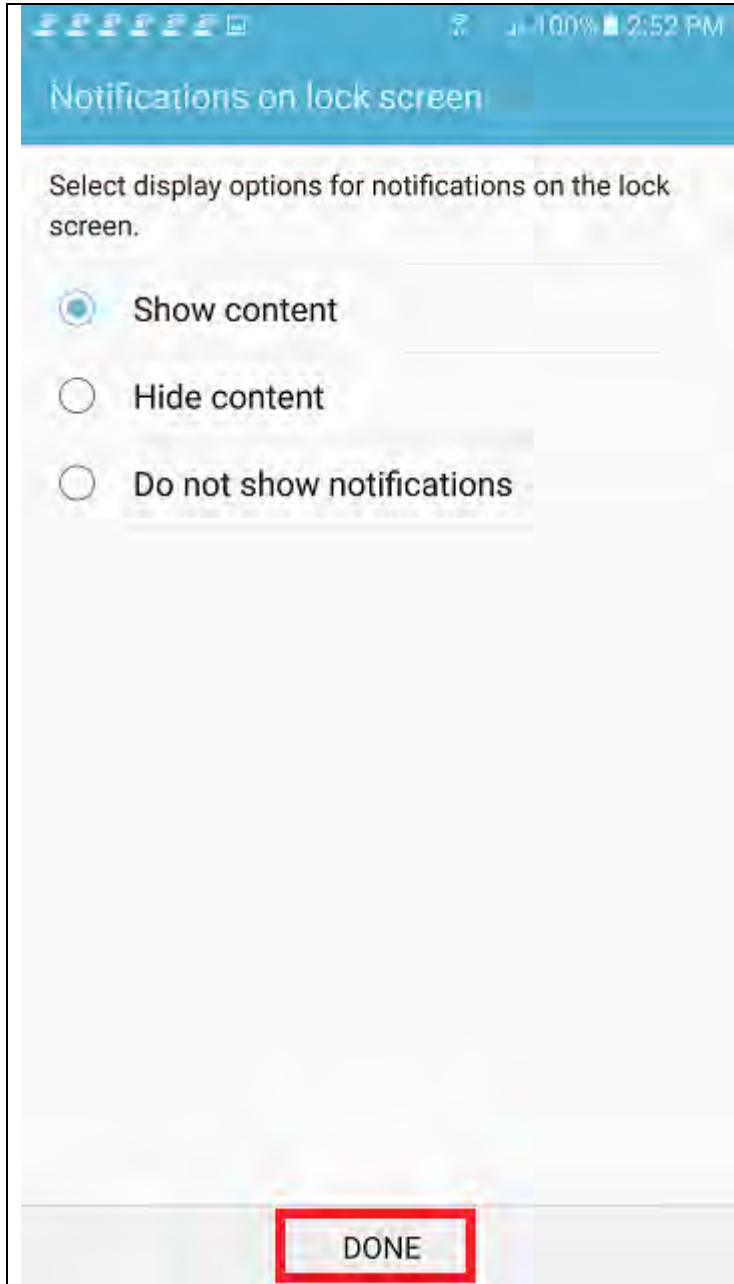

You must have either a pin that is at least 4 digits or a password. Click **PIN**.

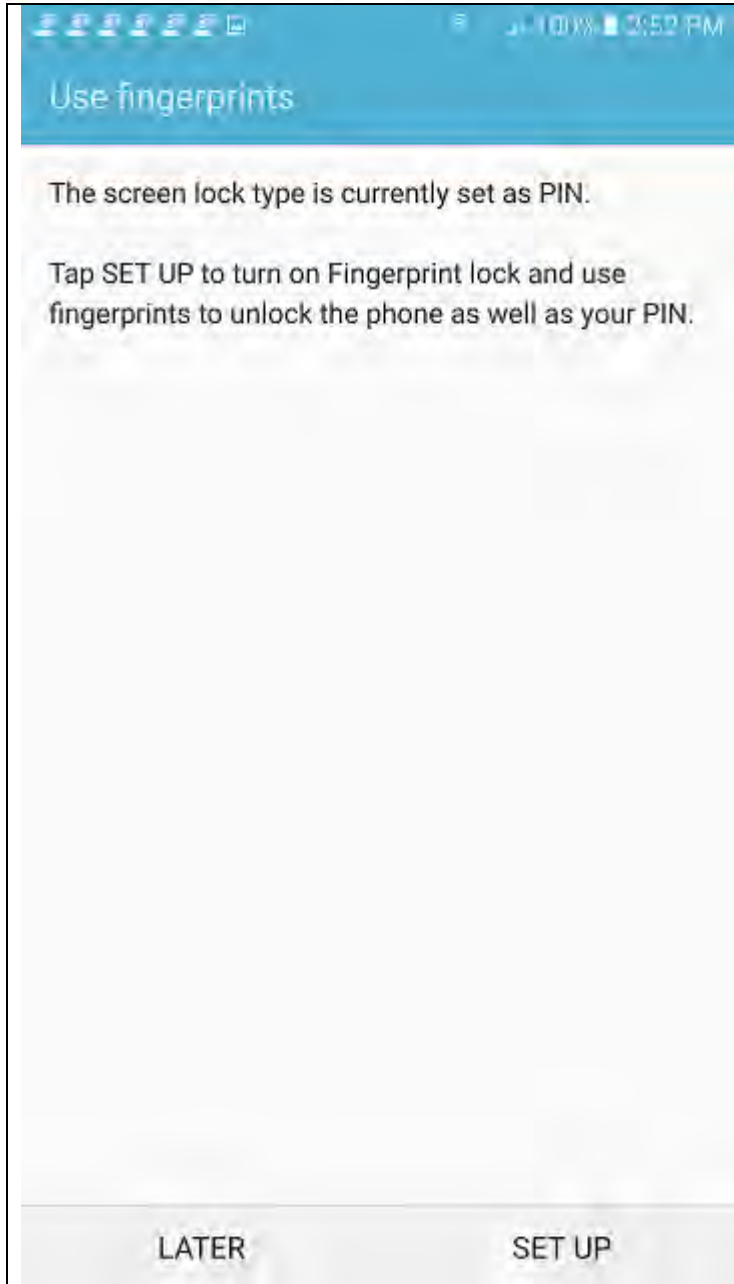

Enter a pin and click **CONTINUE**.

Enter the pin again and click **OK**.

Select if you want to show content on the lock screen and click **DONE**.

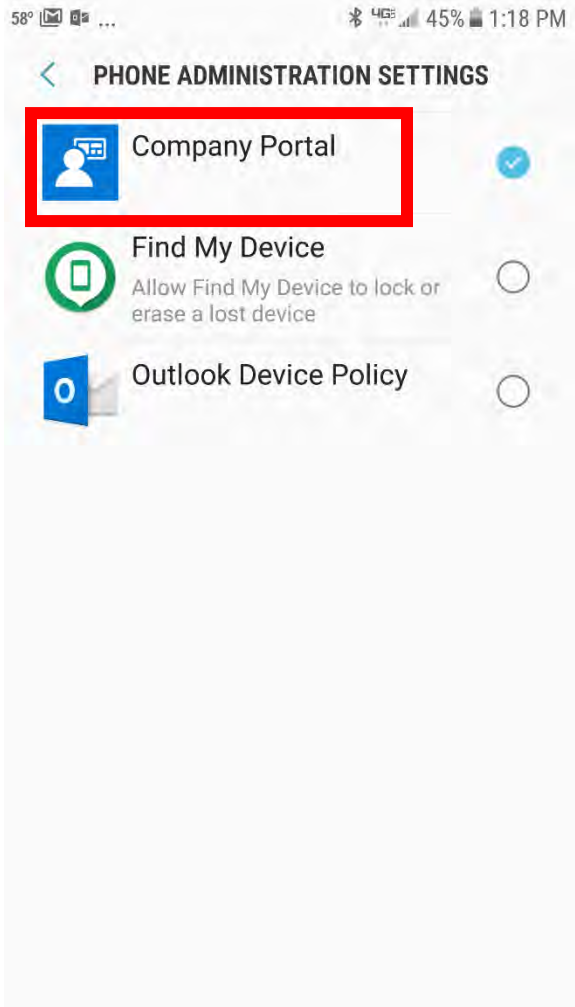

You may be prompted to setup a fingerprint to unlock your phone. You can either click. **SET UP** or **LATER**.

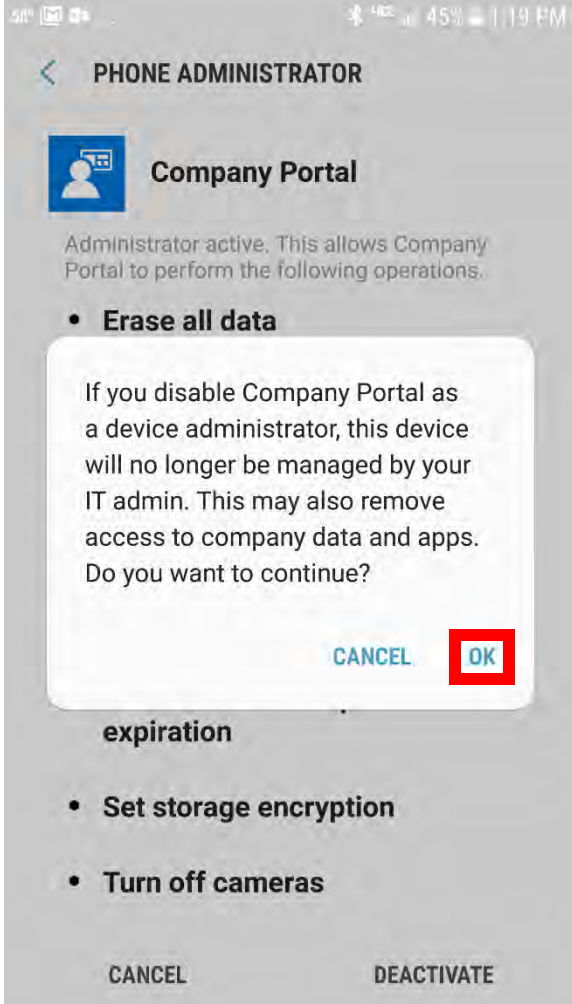

Intune Quick Tips

- Phone Unlock Passcode
 - Passcode must be enabled.
 - Passcode must be at the least 4 numbers long.
 - Passcode must be changed every 90 days.
 - Cannot use your last 5 passcodes.
 - Idle time before device is locked must be set to 5 minutes.
 - Number of failed logins before device will wipe all content and settings is set to 10 times. This is to prevent issues with theft.
- The Outlook Unlock PIN doesn't expire
- The Outlook PIN auto locks after 30 mins
- You cannot manually change the Outlook PIN but you can click "Forgot PIN" and reset it
- When opening weblinks from emails you will be directed to the Company Browser, not the device default browser

Remove Intune BYOD on Android

	<ol style="list-style-type: none">1. Launch Settings then Lock Screen and Security.2. Click Other Security Settings.3. Click Phone Administrators.
