

For 37 years, the Metro Life Flight Critical Care Symposium has provided educational opportunities for health care professionals to enhance their skills and knowledge base.

Metro Life Flight, a national leader in safety and clinical care, provides excellence in critical care transport. Since its inception in 1982, Metro Life Flight has safely transported more than 100,000 patients.

Metro Life Flight is different from other programs because of the dynamic composition of our flight team which consists of a highly trained medical crew and two experienced pilots. Our critical care physicians, acute care nurse practitioners, registered nurses and paramedics consistently provide exemplary medical care throughout all phases of patient transport.

With helicopters at three regional base locations in Lorain, Portage and Wayne County, and critical care ground ambulances based in Cuyahoga and Erie County, Metro Life Flight is readily accessible to the communities we serve throughout northern and central Ohio.

*Metro Life Flight thanks you for your support and your dedication to the emergency medical profession.*

We will also have a series of talks with more in-depth critical care material running concurrently on Friday. Topics will include blood products for trauma patients, anticoagulation reversal, mechanical ventilation, rapid sequence intubation of critically ill patients, and more. The material will be presented by physicians and advanced practice nurses.
