

Outpatient – Part Day Intensive Programs

Supervised, structured programs that offer a wide range of outpatient services which may be coordinated by a case manager and may include individual and group counseling, 12-step meetings, social and recreational activities, educational and vocational services, life skills training, primary health care, perinatal health care, a program for family members, relapse prevention services, a continuing care program and supportive services (such as child care, transportation and parenting skills development) for individuals who have problems related to substance abuse, who need access to treatment to maintain their individual recovery plans but do not require the intensity of a day treatment program or 24-hour hospital care. Participants attend the program on a regularly scheduled basis at least once a month but usually more frequently depending on their individual needs. Intensive outpatient programs are usually available three or four days per week for three or four hours per day.
